

CHAI PEI LING

SOFTWARE DEVELOPMENT ENGINEER (FLUTTER)

+6011-2187 1200 | peling70@gmail.com | [linkedin.com/in/chai-pei-ling-1a8b35261](https://www.linkedin.com/in/chai-pei-ling-1a8b35261)

EDUCATION

Universiti Malaysia Sarawak (UNIMAS)

Dec 2022 - Jun 2026

- **Bachelor of Software Engineering (Hons) | CGPA: 3.83 (TOP 5%)**
- Core Course: Software Requirement Engineering, Web Application Development, Software Security Engineering, Database Concept & Design, Data Structure and Algorithm

Politeknik Kuching Sarawak

Jun 2019 - Dec 2022

- **Diploma in Information Technology (Digital Technology) | CGPA: 3.84 (TOP 5%)**

SKILLS

- **Core Mobile Specialization:** Flutter, Dart, GetX, Streams-Observer Concept, Reactive User Interface Programming, Reusable Widgets Architecture.
- **API & Integration:** RESTful APIs Integration, Third-Party Libraries, Firebase & Google Cloud Services awareness.
- **UI/UX & Performance:** Responsive Cross-Platform Interfaces, UI/UX Design Integration, Application Optimization, Flutter DevTools.
- **Engineering Practices:** Clean Code Standards, CI/CD, Git, AI-Assisted Development.

PROJECTS EXPERIENCE

Point of Sale System for F&B (POS NOW PRO) | Stack: Flutter, GetX, Laravel, Filament, Nginx

- Managed the end-to-end development and deployment lifecycle of a commercial-grade POS product. Independently designed the MySQL database schema, RESTful APIs in Laravel, and the complete Flutter frontend.
- Built a highly responsive mobile frontend by encapsulating reusable widgets and optimizing code architecture.
- Handled server deployment using Nginx and Linux server environments, establishing reliable data storage and real-time transaction processing strategies.

Public Road Intelligence Management Mobile Application (PRIMS) | Stack: Flutter, GetX, SQLite, REST APIs

- Engineered a specialized, offline-first form management module to guarantee reliable field data capture without network connectivity, syncing seamlessly with the backend once online.
- Transformed traditional paper-based workflows into interactive digital layouts, utilizing Flutter DevTools to troubleshoot performance bottlenecks and improve app fluency during heavy data entry.

Event Management Mobile Application (event2go) | Stack: Flutter, Bloc, REST APIs

- Digitized campus event operations by independently constructing the mobile frontend and integrating tightly with backend RESTful APIs.
- Applied strict coding standards and leveraged AI-assisted tools to accelerate UI component generation, debugging, and API documentation writing.

WORK EXPERIENCE

Sarawak Energy Berhad | Software Engineering Intern

April 2025 - Sep 2025

- Supported the pilot launch of the SEPS Mentoring Module by executing comprehensive system usability reviews, isolating bugs, and resolving application navigation blocks.
- Automated manual business workflows via Microsoft Power Automate, successfully reducing manual follow-ups by 80% and demonstrating strong logic design capabilities.
- Optimized data processing pipelines using Excel VBA, improving data query efficiency and saving the team 10 hours per week.

PCloud Sdn. Bhd | Software Engineering Intern

March 2022 - July 2022

- Built and maintained a highly stable Microsoft Visual Basic POS module for retail operations (Sugarbun), handling on-site troubleshooting and continuous user experience improvements.

ADDITIONAL INFORMATION

- **Languages:** English (Fluent), Malay (Fluent), Mandarin (Native)
- **Awards/Activities:** Top 15 Final Year Project (2026), Dean's List Award for 6 semesters, Consolation Prize Winner for 2021 Mobile App Competition, Anugerah Pelajar Cemerlang Politeknik Kuching Sarawak (2022)
